## Winter Weather Driving & Snow Chain Restrictions

### Mountain Hub Winter Preparedness

Apex vehicles stationed in mountain regions (Denver, Salt Lake City, Seattle, Lake Tahoe) are equipped with high-tread all-season tires (M+S rated) and cold-weather windshield wiper fluids rated to -20°F.

### Snow Chains & Tire Socks Policy

- **Tire Chains:** Metallic tire chains are **strictly prohibited** on low-profile sedans, EVs, and luxury models due to inner wheel-well suspension clearance hazards.
- **Approved Traction Devices:** In states with mandatory chain-control laws (e.g., California I-80 Donner Pass, Colorado Traction Law Code 15), renters traveling in AWD/4WD SUVs with M+S tires meet statutory requirements. If fabric snow socks are necessary, approved auto-socks may be purchased at our mountain counters.
