Geographic Driving Boundaries & Cross-Border Travel

Continental United States & Canada

- All Apex vehicles can be freely driven across state borders within the continental United States and into all Canadian provinces with zero border crossing surcharge.
- Unlimited mileage terms remain fully intact while traveling in Canada.

Travel Into Mexico

- Driving into Mexico is **strictly permitted only from our Texas, Arizona, and California border depots** with prior written authorization.
- Must purchase mandatory **Apex Mexico Auto Insurance** (\$35.00/day) at the rental counter, as Mexican federal law does not recognize US domestic insurance or credit card waivers.
- Taking an unauthorized Apex vehicle across the Mexican border is treated as criminal vehicle conversion and automatically voids all insurance.
