Severe Weather Precautions, Flooding, and Hail Damage

Document ID: **DOC-064** | File Reference: emergency_09_severe_weather_and_hail_damage.md | Verification: Active Corporate Policy

Severe Weather Alerts, Hail, and Flooding Precautions

Protecting the Vehicle in Bad Weather

- **Hail Storms:** If severe thunderstorm or tornado warnings are issued with large hail, park under covered hotel porticos, underground garages, or gas station canopies when possible.
- **Flash Flooding:** Never drive through standing water or flooded underpasses. Water ingestion into engine air intakes causes hydrolock, destroying the engine block.

Coverage for Weather Damage

- Weather and act-of-nature damage (hail dents, falling tree branches, flood damage) is fully covered under **Gold Platinum Protection** or **CDW** with \$0 deductible.
- Under Standard Protection, the renter's personal comprehensive auto policy applies, or the \$1,500 standard deductible is charged.
