Fuel Level Verification & Local Station Requirements

5-Mile Proximity Rule

Under the Full-to-Full policy, the vehicle must be refueled at a commercial gas station located within a **5-mile radius** of the drop-off depot.

Retain Your Fuel Receipt

Keep your printed gas pump receipt showing the date, timestamp, number of gallons purchased, and station address. If the fuel gauge reads slightly below 100% due to sensor latency, presenting your receipt within 5 miles guarantees \$0 refueling penalty fees.
