Child Safety Seat Compliance & Installation Policy

Strict Self-Installation Rule

Apex rental agents provide certified, sanitized child safety seats and infant carriers upon request. However, by federal insurance guidelines:

- **Apex counter staff are strictly prohibited from strapping or installing child seats into customer vehicles.**
- The parent, legal guardian, or adult renter is solely responsible for proper tethering, LATCH connection, and seatbelt routing.

Seat Inspection & Sanitation

Every returned car seat undergoes high-temperature steam sanitation and visual structural inspection for harness fraying and buckle integrity before being sealed in protective plastic bags.
